SOLUTION BRIEF

# IRON MOUNTAIN SMART SORT

TAKE CONTROL OF YOUR MEDICAL RECORDS INVENTORY

0

## ACHIEVE YOUR INFORMATION GOVERNANCE AND BUSINESS OBJECTIVES

### YOUR CHALLENGE

YOU NEED TO SORT AND REORGANIZE YOUR RECORDS INVENTORY TO MAKE DEFENSIBLE DECISIONS ON DISPOSITION. UNFORTUNATELY, THIS IS NOT AS SIMPLE AS IT SOUNDS.

## WHAT MAKES DISPOSITION SO COMPLICATED?

- Lack of Inventory Integrity/Visibility: When key metadata is not captured and listed throughout the information lifecycle, it is difficult to search, manage and make decisions on what records to retain, digitize, or destroy.
- Commingled Record Types and Event Date Complexity: Different record types, such as pediatric and adult medical records, have different retention requirements. If records are not organized according to record classification or event date, you can't confidentiality and defensibly take action.
- Reorganizing Records is Labor Intense and Expensive: You lack the resources to sort each file by destruction eligibility date, record type, a unique identifier, or other requirements.

### WHAT THIS MEANS

- Unnecessary Cost: Large volumes of records stored without file-level metadata results in higher storage costs, as records are kept beyond their required destruction eligibility dates.
- Increased Risk: Holding onto records longer than necessary increases the risk of information loss, breach and inadvertent disclosure and regulatory fines and penalties. It also adds complexity and costs to legal discovery, audit response and compliance management processes.
- Lost Productivity: Finding what you need and making quick decisions on records disposition requires a well organized inventory. Without an efficient process to sort and reorganize files, you could lose time and delay your critical objectives.

## DO YOU...

- want to destroy patient medical records but can't confidently isolate which ones are eligible without a substantial investment?
- have a large volume of inherited records?
- have trouble finding patient medical records when you need them?
- want to relocate inventory but first need to destroy what you no longer need?

If you answered yes to any of these questions, <u>ask us</u> about Iron Mountain Smart Sort.

OUR TEAM CAN SUPPORT YOU FROM IRON MOUNTAIN RECORD CENTERS OR AT YOUR LOCATION. IF YOU HAVE RECORDS IN-HOUSE OR AT AN OFFSITE STORAGE FACILITY, WE CAN SUPPORT YOUR NEEDS.

## SIMPLIFY AND **EXPEDITE DECISION-MAKING**

With Iron Mountain Smart Sort, you can guickly and confidently make decisions about the destruction-eligibility of your patient medical records to enable a more compliant and efficient records management program.

Our trained records management team will use input from your Master Patient Index database and records retention schedule to automate defensible decision-making at the file level. We will sort and reorganize your records so that you can confidently make decisions about disposition and quickly meet business objectives, like responding to destruction requirements or legal matter.

#### SMART SORT ENABLES YOU TO MAKE DEFENSIBLE DECISIONS BY SORTING AND REORGANIZING RECORDS BY:

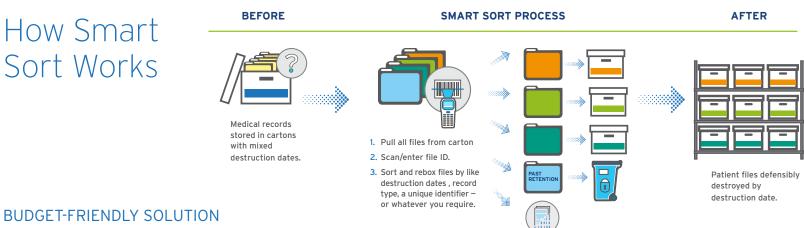

DESTRUCTION DATE | Sort and reorganize your records according to destruction eligibility year so that you can confidently destroy paper medical records as they meet retention dates.

CATEGORY | We will sort and reorganize vour records according to record type, record status, unique identifier – or whatever vou require.

ASSOCIATION | You can also leverage Smart Sort to apply metadata to records at the patient file level so that you can avoid the high cost of manual file-level listing.

The Smart Sort process enables automatic decisionmaking about how each medical record should be managed in order to meet the specific requirements of your organization.

## MAKE DECISIONS ABOUT WHICH FILES TO RETAIN, DESTROY OR DIGITIZE

### **BUDGET-FRIENDLY SOLUTION**

With a single touch, the Iron Mountain team can make a real-time decision, based on your retention policy, about what to do with your patient files. This drives significant efficiencies, allowing us to deliver a truly cost-effective solution.

## SMART SORT EXAMPLE ENGAGEMENT

#### CHALLENGE

A large healthcare organization wanted to reduce cost and risk by destroying records that had met retention requirements. However, they were not able to easily and defensibly identify which records were eligible for destruction, as they lacked the budget required to undertake a long-term and laborintensive discovery project. Constrained by limited resources, the organization's push for defensible destruction was at a standstill.

#### SOLUTION

Following the Smart Sort process, Iron Mountain's team retrieved 48,000 cartons of records and reviewed the contents at the file level. In real time and with one touch of the file, they sorted and reboxed all files by future destruction date and in accordance with the retention schedule while identifying those records that were eligible for destruction.

### RESULTS

> Gained the ability to confidently destroy 1.4M files

- Reduced storage costs while meeting compliance requirements and reducing risk
- > Established a process for ongoing destruction
